Cradle To Cradle We Make Things is a 2002 non-fiction book by German chemist Michael Braungart and US architect William McDonough. It is a manifesto detailing how to achieve their Cradle to Cradle Design model. It calls for a radical change in industry: a switch from a cradle-to-grave

pattern to a cradle-to-

cradle pattern. It

suggests that the

"reduce reuse

recycle" methods

perpetuate this cradle-

to-grave strategy, and

that more changes

need to be made. The

However, much more impressive is the Cradle to Cradle (C2C) philosophy.

Traditional recycling is flawed - instead, we need to change the way we design things.

A cradle to grave philosophy is no
