3.1 Data Center

Monitoring

Overview ...

The layers of the data center design are the core, aggregation, and access layers. These layers are referred to extensively

File Type PDF

Data Center

throughout this guide and are briefly

described as

follows:

- Core layer—Provides the high-speed packet switching backplane for all flows going in and out of the data center. The core layer provides

File Type PDF

Data Center

connectivity to
multiple
aggregation
modules and
provides a
resilient Layer
3 routed fabric
with no single
point of
failure.
