*Given technological advances in gathering and storage of data, society's optimal consumption of data is higher than ever. As private sector may not invest in harnessing data where it is profitable, the government must intervene in creating data as a public good, especially of the poor and in social sectors of the country, the Survey said.

Harness data as public good, says Economic Survey 2019

In terms of arguing about public goods, information is a public good. My consumption of a fact doesn't prevent you from consuming it. It's non-excludable—you can consume a fact even if you haven't paid for it. It's also the positive externalities, or positive spillovers, that may be a way to show the economists.
