your own formula by using DAX. A
measure is used in the Values
area of a PivotTable.

Data Analysis Expressions (DAX) in Power Pivot - Excel

Power Pivot provides Data Analysis Expressions (DAX) for creating custom calculations in Power Pivot tables and in Excel PivotTables. DAX includes some of the functions that are used in Excel formulas, and additional functions that are designed to work with relational data and perform dynamic aggregation. Here are some basic formulas that could be used in a calculated column:

Excel To The Excel Revolution

Build your DAX expression on the PowerPivot Formula bar more or less as you build an Excel formula in a cell of one of its worksheets. To use a DAX function in the expression, click the Insert Function button on the PowerPivot Formula bar and select the function to use in the Insert Function dialog box (which is very similar to the standard Excel Insert Function dialog box except that it contains only DAX functions).
