Deep Reinforcement
Learning for Event-
Driven Multi-Agent
Decision Processes.

Abstract: The incorporation of macro-actions (temporally extended actions) into multi-agent decision problems has the potential to address the curse of dimensionality associated with such decision problems.

File Type PDF Deep Learning

Since macro-actions last for stochastic durations, multiple agents executing decentralized policies in cooperative environments must act asynchronously.

Building on these results, we demonstrate an event-driven random BP (eRBP) rule that

File Type PDF Deep Learning

uses an error-modulated synaptic plasticity for learning deep representations. Using a two-compartment Leaky Integrate & Fire (I&F) neuron, the rule requires only one addition and two comparisons for each synaptic weight, making it very suitable for implementation in digital or mixed-signal neuromorphic hardware.

We are looking for a talented and enthusiastic postdoc who will join our team to develop deep learning methods for low-latency object detection and recognition using novel “event-driven” sensors.

File Type PDF Deep Learning

The candidates will take an “event-driven” approach to robotics, in which sensor signals are not sampled at a fixed rate, but specialised sensor electronics output only when there is a significant change.

Event-Driven Market
Prediction with Deep
Learning Market prices
for stocks, equities,

File Type PDF Deep Learning

derivatives, or commodities are highly influenced by economic events. For example, an earnings announcement of a company is known to affect its stock price.

Event-Driven Market Prediction with Deep Learning

Deep learning is a series of models that have the ability to extract deep

File Type PDF Deep Learning

features from input data with deep neural network architecture.

Deep learning models usually have more than three layers. The deep network is typically initialized by unsupervised layer-wise training and then tuned by supervised training with labels that can progressively generate more abstract and high-
