The Degasi Seabases are habitats constructed by the three survivors from the Degasi, a spacecraft that crashed on Planet 4546B about a decade before the Aurora. There are three such bases found within the game world, two of which have several sub-bases in their surroundings. All of the bases are in various states of disrepair.

The Snowman is a Seabase Module that can be built outside of seabases. It is purely decorative, though it can be interacted with and destroyed. Snowmen can be built on Foundations or on dry land. A pre-built snowman can be found near Outpost Zero. The blueprint for this item can be acquired by scanning the pre-built one outside of Outpost Zero. This module is crafted with the Habitat Builder ...

The H.A.U.L. Suit (Haul Suit), or the Heavy Automated Utility Loading Suit, was created by William Squalo, who, stories say, destroyed an entire Alterra cargo ship mid-flight by themselves as a final act of rebellion, before leaving the group to start their own line of vehicles used for challenges their new organization had to overcome. This specific invention of theirs uses resources stolen ...
