Dementia: Presentations, Differential Diagnosis, and ...

Delirium (sometimes called 'acute confusional state') is an acute, fluctuating syndrome of disturbed consciousness, attention, cognition, and perception. It is a common condition in the differential diagnosis for dementia. People with cognitive impairment are at increased risk of delirium, and the two conditions often coexist.

Differential Diagnosis. Alzheimer's disease accounts for up to 80 percent of all dementia cases. Diagnosis may be complicated by other forms of dementia that have symptoms and pathologies similar to Alzheimer's disease.

Knowing the key features and pathology of each type of dementia can help in the accurate diagnosis of patients, so they will receive the treatment and support services appropriate for their condition and maintain the highest possible quality of life.

Differential Diagnosis | Alzheimer's Association

Mood disturbances and mood disorders are common in vascular dementia. Psychosis, delusions, hallucinations and paranoia can often be seen, especially in later stages. Patients should be screened for depression and for signs of psychomotor retardation (often a more common feature than positive signs of depression).

Dementia: Types and Differentials | Geeky Medics

Differential Diagnosis for Dementia. Progressive supranuclear palsy: PSP is often misdiagnosed because it is relatively rare and some of its symptoms are very much like those of Parkinson's disease. Memory problems and personality changes may also lead a physician to mistake PSP for depression, or even attribute symptoms to some form of dementia.

Differential Diagnosis of Dementia

differential diagnosis of dementia. Ambiguity regarding the nature of neuropsychological differences among dementia groups and those with depression has served to obscure the ability to make a distinction among these diagnoses. The neuropsychological differential diagnosis of dementia is further complicated by the fact that little research has

NEUROCOGNITIVE DIFFERENTIAL DIAGNOSIS OF DEMENTING ...

Abstract. Background: Dementia with Lewy bodies is one of the most prevalent dementia diagnoses. However, differential diagnosis between dementia with Lewy bodies, Alzheimer's disease, and Parkinson's disease with dementia can still be very difficult given the overlap in neuropathology, clinical presentation, cognitive, and neuroanatomical changes. Method: A literature review of dementia with Lewy bodies, Alzheimer's disease, and Parkinson's disease with dementia was conducted using PubMed.

Dementia | Johns Hopkins University Press Books

Last revised in September 2020 The differential diagnosis of depression includes: Grief reaction — depressive symptoms may be transiently present in normal grief. Uncomplicated bereavement and major depression share many symptoms, but active suicidal thoughts, psychotic symptoms, and inappropriate guilt are rare with normal bereavement.
