widespread native distribution in Africa and the Arabian Peninsula, so in the UK it needs to be grown under glass all year. It's a popular choice for bonsai, in part owing to the swollen caudex, which stores water. For best results, grow *Adenium obesum* under glass all year, in a container with well-drained soil, with added sharp sand to boost drainage.

They tend to grow spindly in climates with cloudy summers or if they receive sun less than half the day. In desert climates most taxa perform best in light afternoon shade (30-50%). Mature plants of all taxa can be acclimated to full desert sun, though only *Adenium swazicum* performs well in extreme heat. In cooler, cloudier, or more humid climates adeniums should be in full sun all day outside or with 4000-6000 footcandles under glass.
