Permission to start nuclear construction does not always imply that the regulator is satisfied that the design can be licensed for operation. Establish a highly-qualified team to develop the design, secure the safety case, plan the procurement and build schedule in detail in collaboration with main contractors.

The OFNP is a nuclear plant specifically designed for the global market: it can be constructed in one country or multiple countries and exported internationally. It lends itself to a flexible and mobile electricity generation strategy, which minimizes the need for indigenous nuclear infrastructure in the host country and does not commit the customer to a 40 to 60 years-long project.

Summary. The application of 'security by design' in nuclear new builds could provide operators with the opportunity to establish a robust and resilient security architecture at the beginning of a nuclear power plant's life cycle. This will enhance the protection of the plant and reduce the need for costly security improvements during its operating life.
