technique that
makes use of how
sound waves travel
through the body.

When sound waves
pass through the
body, they bounce
off tissues and
organs in certain
ways. The reflected
waves can be used
to make images of
the organs inside.

The sound waves

Ultrasound Examination in the Practice of Urology

An ultrasound is used to show details of structures in the abdomen. It can show features

Read Free Diagnostic

like the size and movement of organs, cysts or growths, or fluid collections. An ultrasound of the abdomen is most often done to:

Diagnose an injury or disease; Help determine the cause of abdominal pain, especially appendicitis
