When a patient is formally admitted to a hospital upon the physician's orders who then take care of your extended stay at the hospital stay, he is considered an inpatient. Outpatient coding refers to a detailed diagnosis report in which the patient is generally treated in one visit, whereas an inpatient coding system is used to report a patient's diagnosis and services based on his extended stay.

The guidance in the article referring to the 2007 CC re: coding chronic conditions only applies to inpatient, not outpatient. Coding guidelines for reporting chronic conditions is not superseded by whether or not there is a HCC vs a non-HCC and just to get paid. It will ALWAYS come down to documentation.

### *To Code or Not To Code | Journal Of AHIMA*

Coding guidelines for inconclusive diagnoses (probable, suspected, rule out, etc.) were developed for inpatient reporting and do not apply to outpatients. A. Selection of first-listed condition In the outpatient setting, the term first-listed diagnosis is used in lieu of principal diagnosis.
