Coping with Trauma-Related Dissociation : Suzette Boon ...

Most health professionals believe dissociation is a way the mind copes with too much stress. Many people with a dissociative disorder have had a traumatic event during childhood, although dissociation can also occur with other types of trauma. This is called Trauma-Related Dissociation. Trauma-Related Dissociation is sometimes described as a 'mental escape' when physical escape is not possible, or when a person is so emotionally overwhelmed that they cannot cope any longer.

Coping with anxiety, trauma and dissociation during ...

Dissociation is commonly displayed on a continuum. In mild cases, dissociation can be regarded as a coping mechanism or defense mechanism in seeking to master, minimize or tolerate stress - including boredom or conflict. At the non-pathological end of the continuum, dissociation describes common events such as daydreaming. Further along the continuum are non-pathological altered states of ...
