The early cost estimation of injection moulded components ...

In terms of cost estimating, in the past, before a final estimate of the total cost for a product could be put out, price quotation had to be made by the plastic injection manufacturer after the R&D firm had come up with a design for the plastic injection molding part, hence cost estimating was usually delayed, and then cost estimating was often conducted on an empirical basis which made it disputable; on the other hand, though cost-model-based calculation offers efficiency, it only takes ...
