Environmental  
economists study the  
economics of natural  
resources from both  
sides - their extraction  
and use, and the waste  
products returned to the  
environment. They also  
study how economic  
incentives hurt or help  
the environment, and  
how they can be used to

## ~~Education For Sustainable Development~~

I ' ve recently come across some excellent discussions on the

interrelationship  
between sustainability  
and economics. The gist  
of the discussions is that  
there is not a trade-off  
between a sustainable  
business model or  
sustainable  
manufacturing and  
profit – one can  
minimize the impact to  
the environment and  
maximize profit at the  
same time.
