future—the effects of global warming are appearing right now. The heat is melting glaciers and sea ice, shifting...

Global warming and climate change effects: information and ...

There are already many effects of global warming being seen. As Earth has gotten warmer, sea ice has melted. This has raised the level of water in the oceans about 3 mm per year. The rate of sea level rise is now accelerating and might be more than 10 mm per year in 2100.

Global Warming Lesson Plans & Worksheets | Lesson Planet
Greenhouse Effect and Global Warming. One of the biggest challenges our students' generation will face is climate change. For many years, scientists have linked the increased average global temperatures to the increased amount of carbon dioxide and other greenhouse gases in our atmosphere. These gases act like the glass in a greenhouse—letting radiation through, which warms the planet, but not allowing the heat to escape.
