Ampere is the electrical unit of electrical current. It measures the amount of electrical charge that flows in an electrical circuit per 1 second. $1A = 1C / 1s$. Ohm (Ω) Ohm is the electrical unit of resistance. $1\Omega = 1V / 1A$. Watt (W) Watt is the electrical unit of electric power. It measures the rate of consumed energy. $1W = 1J / 1s$. $1W = 1V \cdot 1A$

Electrical Units of Measure and Descriptions

Electrical measurements are the methods, devices and calculations used to measure electrical quantities. Measurement of electrical quantities may be done to measure electrical parameters of a system. Using transducers, physical properties such as temperature, pressure, flow, force, and many others can be converted into electrical signals, which can then be

conveniently measured and recorded.
