In TW-ECDM, a wire is used as the tool-electrode in a similar manner as in wire electrical discharge machining (WEDM). Copper wires [59,92], stainless steel wires [92], or brass wires [100,105,106] are typically used.

SlideShare

Electrical discharge machining, or EDM, is a non-traditional method in which material is removed from a workpiece using thermal energy. Much like processes such as laser cutting, EDM does not

File Type PDF Electrical Discharge Machining Wire

need mechanical force in the removal process. This is the reason why it is considered non-traditional contrary to, for example, the processing with cutting tools.
