Developing With  
Embedded Linux is a  
4-day course  
providing the practical  
skills and knowledge  
required to work with  
Linux in this

Access Free

Embedded

environment. The

course provides an overview of what an embedded Linux

system is comprised

of and provides practical information

about how to work with each of the components.

xxviii Embedded  
Linux Primer, Second  
Edition binary  
components that  
make up a kernel  
image, how they are  
loaded, and what  
purpose they serve on  
an embedded system.  
In this book, you will  
learn how the Linux  
kernel build system  
works and how to  
incorporate your own

Access Free

Embedded

custom changes that  
are required for your  
projects.

**Many of the  
designations used  
by manufacturers  
and sellers ...**

Part of your job as a  
custom embedded  
Linux developer is to  
adopt this DTS to  
your own  
MPC8548-based

Access Free

Embedded

system. Some of the data shown in Listing 7-14 is self-explanatory. The flat device tree is made up of device nodes.
