The spread of an infection is determined by the anatomy of the anorectal region. There are five anatomic spaces into which an infection can spread (Figure 110-3). 5 The perianal space is located at the area of the anal verge.The ischiorectal space, which is continuous with the perianal space, extends from the levator ani muscle to the perineum.

Chapter 110. Perianal Abscess Incision and Drainage ...

An autotransfusion may occur in the Emergency Department, Operating Room, and Surgical ICU with increasing frequency. In this procedure, the shed blood is collected, mixed with an anticoagulant, concentrated, washed or filtered, and then returned through an intravenous (IV) line to the patient. Harmful contaminants such as potassium, fat, and free hemoglobin are removed from the salvaged blood.
