□ Epson printer Web interface configuration The interface's Web configuration supports  
Ethernet IV module configuration via the standard Internet browser. 1. Install the interface and  
load paper in the printer. 2. Set DIP switch 4 to on and turn on the printer. 3. Open up Internet  
Explorer and type 192.168.192.168 in the address bar and press enter.

### Epson Printer Configuration with EthernetIV I/F Module

In order to connect to a wired Ethernet connection, your printer needs to have an Ethernet port  
on the rear. This will vary depending on the model printer you have. Acquire an Ethernet cable  
and connect it to the port on the back of the printer. Take the other end of the Ethernet cable  
and plug it into your router's Ethernet port.

### How to Connect an Epson Printer to a Wired Network ...
