Examining the Factors - ERIC

Analytical examination of the physical (environmental) factors affecting extant diversity. For the six marine provinces we estimated the total area (km²), the length of coastal line (km), and the percent area of bathymetry (categorized in: 0–200, 200–1,000, and >1,000 m depth) . We analyzed the correlation between species diversity and these three variables.

Shark and ray diversity in the Tropical America ...

For example, distance from the coast is an important determinant of diversity, however, while annual diversity increases, herbaceous perennial diversity decreases (see also Ammirati, 1967). Calculated solar insolation, which across these sites is largely influenced by slope aspect, is also an important determinant of diversity, with drier sunnier slopes decreasing diversity of some perennial life forms but increasing diversity of other life forms.
