~~The custom format to show number in thousand or in million is simple: #,##0,;[k]. #,##0,;[M]. The [k] or [M] is optional, depend on whether you want to show it in the header or in the figure itself. The trick is to put 1 comma and 2 comma at the end of the format setting (#,##0) for {thousand} and {million} respectively.~~

~~Format truncates format to 257 characters.. If you try to format a number without specifying format, Format provides functionality similar to the Str function, although it is internationally aware. However, positive numbers formatted as strings using Format don't include a leading space reserved for the sign of the value; those converted using Str retain the leading space.~~
