## **Emergency Shower Requirements - Quick ...**

Eyewashes and showers should be installed in well-lit locations with signage and must be on the same level as the work area's hazards. Eyewashes and showers must keep water or flushing fluids between 60 and 100 degrees Fahrenheit, even if they're installed outdoors or in cold or hot indoor environments.

## **Workplace Eyewash and Emergency Shower Requirements ...**

The nozzles should be at least six inches from any obstruction and mounted between 33 and 45 inches above the floor. An eyewash gauge should be used to verify and test the flow pattern.

Requirements for both. Both safety showers and eyewash stations must be able to provide the recommended flow for at least 15 minutes.

### **OSHA and ANSI Requirements for Eyewash and Safety Showers ...**

As the standard states, an eyewash and/or safety shower would be required where an employee's eyes or body could be exposed to injurious corrosive materials. If none of the materials used in this work area is an injurious corrosive [chemical] (as indicated by the Material Safety Data Sheet (MSDS) for each product), then an emergency eyewash or shower would not be required pursuant to 1910.151(c).

## FLUSHING & FLOW RATE

REQUIREMENTS What are the flushing requirements for eyewash stations? A gravity fed portable and plumbed eyewash both require flushing of 0.4 (GPM) gallons per minute, which is 1.5 liters, for a full 15 minutes with valves that activate in 1 second or less and stay open to leave the hands free.

## **FAQ's | Emergency Eyewash Requirements | OSHA Standards**

Emergency showers and eyewashes are required by the ANSI/ISEA Z358.1-2014 standard to be activated weekly, with a

## **ANSI / ISEA Z358.1-2014 Compliance Checklist**

ANSI Z358.1 provides detailed information regarding the installation and operation of emergency eyewash and shower equipment, including the requirements for flow rate.

Section 4.1 of ANSI Z358.1 specifies that emergency shower heads shall be capable of delivering a minimum of 75.7 liters per minute (20 gpm) of flushing fluid at a velocity low enough to be non-injurious to the user.

## **ANSI Z358.1 guidance for complying with 1910.151(c ...**

The first is a general requirement

for emergency showers and eye wash stations. The second is specific to certain industries. OSHA's general regulation is applicable to all facilities that require the installation of an emergency shower or eye wash station equipment as a form of first aid. [29 CFR 1910.151 (c)].

### **Emergency Shower and Eye Wash Station Requirements**

Safety shower flow rates must meet the need for sufficient flow of water to flush the affected area completely. Showers require a minimum supply of 20 gallons per minute at a pressure of 30 lbs. per square inch for at least 15 minutes. Eye washes require a minimum flow rate of 0.4 gallons per minute.
