FEATURES SHOWN ON TOPOGRAPHIC MAPS ABSTRACT Topographic maps represent features on the earth's surface by means of symbols and labels; separate colors distinguish the main classes of map features. The amount of information shown on a topographic map depends on the map scale, the purpose of the map, and the cost of obtaining the information.

FEATURES SHOWN ON TOPOGRAPHIC MAPS - USGS

Topographic maps depict four main types of features: Landforms: hills, valleys, gullies, ridges... Water courses: rivers, swamps, coastal... Vegetation: national parks, farmland, plantations... Manmade: buildings, roads, property boundaries, political boundaries...

Recognising topographic features – Bushwalking 101

Topographic maps are 2-dimensional representations of the 3-dimensional surface features of an area. Topographic maps have contour lines that connect points of identical elevation above sea level. Contour lines run next to each other. Adjacent contour lines are separated by a constant difference in elevation, usually noted on the map.

Online Library Features Shown On Topographic Maps

Topographic maps use symbols to represent natural and human constructed features found in the environment. The symbols used to represent features can be of three types: points, lines, and polygons. Points are used to depict features like bridges and buildings. Lines are used to graphically illustrate features that are linear.

2(d). Topographic Maps - Physical Geography

The various features shown on the map are represented by conventional signs or symbols. For example, colors can be used to indicate a classification of roads. These signs are usually explained in the margin of the map, or on a separately published characteristic sheet. Topographic maps are also commonly called contour maps or topo maps.

Topographic map - Wikipedia

Types of Maps – Topographic Maps Introduction. Like General Reference Maps, Topographic Maps are a summary of the landscape and show important physical (natural and man-made) features in an area. The primary difference is that they show elevation in detail. Characteristics of topographic maps include: they show elevation using contour lines. Put simply, a contour line is a line which joins points of equal elevation above sea level
