Pain scoring systems in the canine and feline patient
Claire Bloor Friday, June 2, 2017
It is important that veterinary professionals are able to recognise and assess pain in patients under their care. Veterinary patients cannot verbalise, or self-report on the amount of pain they are experiencing, so it is the responsibility of the ...

observation, the user marks the point on the line that best correlates with the patient's pain intensity.

Assessment Of Acute Pain In Cats - Today's Veterinary

...

Weighted Cohen's kappa was used to determine inter-rater reliability centered on the 'need to reassess analgesic plan' (dichotomous scale). A separate cohort of 47 cats was evaluated independently by two raters (one board-certified anesthesiologist and one veterinary small animal rotating intern) using the CSU-FAPS and the Glasgow Composite Measure Pain Scale

Acces PDF Feline Acute Pain Scale Colorado State

(CMPS-Feline), and Spearman rank-order correlation was determined to assess convergent validity.

Preliminary appraisal of the reliability and validity of

...

The Glasgow Feline Composite Measure Pain Scale, developed for evaluation of acute pain in cats, uses ear position and muzzle shape in addition to the previously mentioned measures to provide quantifiable, validated pain scoring. To download a PDF of the pain measure scale, click Glasgow Feline Composite Pain Measure Scale.
