of many “ fiber-to-the-x ” (FTTx) network designs.

What Is Fiber To The Home (FTTH) Technology

Fiber to the home (FTTH), also called fiber to the premises (FTTP), is the installation and use of optical fiber from a central point directly to individual buildings such as residences, apartment buildings and businesses to provide high-speed internet access. FTTH dramatically increases connection speeds available to computer users compared with technologies now used in most places.

(PDF) Introduction of Fiber To The Home Technology

Fiber-to-the-home deployments are a better option for consumers today, and they are the only option that will allow expansive, efficient upgrades to America ' s networks for a generation. This is not to say that no broadband technology will ever surpass fiber-optics, but we know the limitations of existing technologies in use today.
