Abstract Financial intermediation is an important activity in the economy because it allows funds to be channeled from people who might otherwise not put them to productive use to people who will ultimately put the funds to productive uses.

Financial Intermediation and Economic Development In ...

Abstract. In stressing the importance of financial intermediation in the development of the LDCs, neither the approach of financial deepening nor that of real interest rates has clarified the relationship between financial intermediation and real development. This paper shows—within a two-sector model, but extendable to the n-sector case—that high (equilibrium) real interest rates are growth-promoting, even if total real savings is interest insensitive (a controversial empirical ...
