In general, A First Course in Database Systems database instance describes a complete database environment, including the RDBMS software, table structure, stored procedures, and other functionality. Remember, these normalization guidelines are cumulative. No reviews yet. Finally, fourth normal form 4NF has one additional requirement:. It is a type of candidate key that is usually the first column in a table and can be automatically generated by the database to ensure that it is unique.

First Course in Database Systems: Ullman, Jeffrey D ...

For me the text is really difficult for a "First course" in database. Figures and Examples are just plain injected between the chapter text, hard to find them with no symbols next to them or any colors or borders. I recommend that you find it in a library first and read some sections and see if it works for you.
