Book solution "A First Course in Probability", Ross

...

$$q_m^{n-1}(1-p)^n$$

$$q_m^{n-1} + p^n = q_m^{n-1} p^n + 1. \quad (5.8)$$

Since Equations (5.7) and (5.8) sum to 1, it follows that, with probability 1,

Read PDF First Course In Probability Solutions 8th

either a run of n successes or a run of m failures will eventually occur.

As an example of Equation (5.7), we note that, in tossing a fair coin, the probability that a run of 2 heads will precede a run of 3 tails is $\frac{7}{10}$.
