Flood Risk Management in Europe: An exploration of ...

Flood mapping is a crucial element of flood risk management. Directive 2007/60/EC on the assessment and management of flood risks will require Member States to prepare two types of maps by 2013 (art 6) : Flood hazard maps, showing the extent and expected water depths/levels of an area flooded in three scenarios, a low probability scenario or extreme events, in a medium probability scenario (at least with a return period of 100 years) and if

appropriate a high probability scenario.

Flood mapping: a core component of flood risk management ...

Flood Risk Management is by definition dealing with uncertainty. Floods occur often enough, but the timing and location of flood events are uncertain, and so is the response of society. But the concepts and methods of flood risk analysis and management are progressively tuned to deal with this kind of uncertainties.

FLOODrisk 2020 | 21st June - 25th June 2021 | Budapest

The European Union is addressing flood risk through the Floods Directive. Countries are required

Germany - Study Sees Improvements in Flood Risk Management Since 2002 Floods.

15 May, 2017 by FloodList News in Europe, Flood Protection. A review of flood risk management in Germany has compared how the country coped in the wake of the 2013 floods with the situation after the major floods of 2002. The study found areas of considerable progress, but some areas, such as cross-border and interdisciplinary cooperation, still need improvement.
