SOLVED: Ford Focus Engine System Fault warning light - Fixya

the most common fault regarding this issue and symptoms is a problem with the fuel system most commonly the pump going as well as debris in the tank to faulty injectors no codes stored and many have had to go to ford who have done many things including hand priming the system.

Engine System Fault ??? - Ford Focus Club - Ford Owners ...

If the temp gets to hot , the engine will shut down. You may want to check your coolant level .what temp is your engine running at .Ford has had a problem with the instrumentation cluster as well so you may want to check that out

SOLVED: Why does it say engine system fault acceleration ...

Often referred to as the MAF sensor, the mass airflow sensor can fail, triggering Ford check engine light to come on. If your Ford MAF sensor is defective, you will notice engine hesitation during acceleration and a dramatic fuel economy decrease. Typical codes stored in the ECU when the MAF fails are P0171 and P0174.

Troubleshooting Ford Check Engine Light | YOUCANIC

it can be an alternator issue with the smart charge dropping off and on this can cause the engine light to illuminate usually with the battery light though a coil pack issue or plugs could also cause it to happen as these dont always log fault codes but will throw the light on it could also be a temp sensor fault all of which are a pain to diagnose and require pro tools to test them without the code best bet is have a diagnostic done at ford who can look at the live data and do tests oin the ...
