Phytoplankton Guide

An online taxonomic guide This Guide is designed both for those needing help in identifying phytoplankton species, as well as experienced taxonomists. It offers several avenues to find a particular species of interest. Once your species of interest is located, you will be taken to an Organism page that lists taxonomic details about that species.

Phytoplankton List

Freshwater Algae provides a comprehensive guide to temperate freshwater algae, with additional information on key species in relation to environmental characteristics and implications for aquatic management. Existing books on freshwater algae fall into two categories: simple identification texts or highly specialised research volumes.

serving as the first link in the conversion of sunlight and nutrients into biomass.

Phytoplankton Identification Gallery

This Guide is based upon personal observations of freshwater crustacean zooplankton (Cladocera and Copepoda) found in Sudbury Region lakes, located in Northeastern Ontario, Canada. The purpose was not to provide thorough details on all aspects of zooplankton taxonomy, nor to present identification keys since these already exist (refer to Section 4).
