Albert Einstein had a marriage before Elsa as well. His first wife, Mileva Maria, was a Serbian mathematician and the two were married in 1903. Though Einstein was initially charmed and impressed by Maria, an archive of nearly 1,400 letters written by Einstein gave evidence that he became detached and even cruel to his first wife.

To understand the ideas and aims of string theory, it's useful to look back and see how physics has developed from Newton's time to the present day. One crucial idea that has driven physics since Newton's time is that of unification: the attempt to explain seemingly different phenomena by a single overarching concept. Perhaps the first
