specific functional foods such as coffee, green tea, berries, nuts, olive oil, pomegranate, avocado, and ginger. Specific bioactive compounds of those foods-such as caffeine, catechins, gallic acid, anthocyanins, ascorbic acid, polyphenols, oleuropein, capsaicin, and quercetin-may contribute to weight management, obesity prevention, and obesity's metabolic consequences.

functional food components specifically for treating cancer, including isoflavones, bioactive functional foods, bioactive compounds, biomarkers, phyto-chemotherapeutic agents, nanoparticles, and flavonolignans.

~~Bioactive Compounds and Cancer- Functional Food~~

Polyphenols, carotenoids, and peptides are the most studied bioactive compounds. Bioactive components, such as chitosan, polyunsaturated fatty acids, and astaxanthin from marine animals and tocopherols of oils of plant origin have excellent potential as functional food ingredients, since they have health benefits.
