Satellite Communications Training
Fundamentals - ENO INSTITUTE

The telemetry, tracking, and command (TT&C) subsystem performs several routine functions aboard a spacecraft. the telemetry or "telemetering" function could be interpreted as "measurement at a distance". specifically, it refers to the over all operation of generating an electrical signal proportional to the quantity being measured, and encoding and transmitting this to a distant station, which for satellite is one of the earth stations, which for the satellite is one of the earth stations.
