Commodities Trading: An Overview - Investopedia

A futures contract is an obligation to buy or sell specific quantity of a certain commodity or asset on a future date at an agreed upon price. Because the terms of futures contracts for each commodity or asset are standardized (i.e., same quantity, quality, delivery), they can be traded on an exchange. The only variable is the price.

Thomas A. Hieronymus ECONOMICS OF FUTURES TRADING

A futures contract is an agreement to buy or sell a commodity at a date in the future. Everything about a futures contract is standardized except its price. All of the terms under which the commodity, service or financial instrument is to be transferred are established before active trading begins, so neither side is hampered by ambiguity.
