Geometria situs is the Latin term adopted for the study of the geometry of place, a field of mathematics which has become known as topology. Topology deals with the spatial properties of an object which remain constant when undergoing deformations such as compression or stretching, but not by cutting or gluing. Some objects may be deformed into each other; the classic example is a coffee cup ...

Geometria is a typeface of clean shapes that is well-suited for continuous reading, and it sets remarkably well. At the same time, it can be friendly, even flirtatious. Its distinct personality combines seeming opposites. At times it may appear serious, at times playful. On occasion, it may be deliberate, other times dynamic. It could seem rigid, then elegant. It is a typeface that could be ...
