Modern utilization of geothermal energy includes direct use of the heat and its conversion to other forms of energy, mainly electricity. Geothermal energy is a form of renewable energy and its use is associated with very little or no CO₂-emissions and its importance as an energy source has greatly increased as the effects of climate change become more prominent.

Ingrid Stober, Kurt Bucher
(auth.) The internal heat of
the planet Earth represents
an inexhaustible reservoir
of thermal energy. This form
of energy, known as
geothermal energy has been
utilized throughout human
history in the form of hot
water from hot springs.
