[\(PDF\) The Rise of Research in Graphic Design](#)

Graphic design uses visual compositions to solve problems and communicate ideas through typography, imagery, color and form. There's no one way to do that, and that's why there are several types of graphic design, each with their own area of specialization. Though they often overlap, each type of graphic design requires specific set of skills and design techniques.

[The 8 Types of Graphic Design](#)

Graphic design is the process of visual communication through the use of typography, photography, iconography and illustration. The field is considered a subset of visual communication and communication design, but sometimes the term "graphic design" is used synonymously. Graphic designers create and combine symbols, images and text to form visual representations of ideas and messages. They use typography, visual arts, and page layout techniques to create visual compositions. Common applications
