Through BASF's Green Sense Concrete mixture optimization service, Eastern Concrete Materials was able to proportion an EF Technology® concrete mixture with 71% cement replacement. The mixture replaced portland cement with the recycled materials, non-cementitious fillers and specialized admixtures to exceed all the performance targets specified by the One World Trade Center project stakeholders.

[Green Sense Concrete® - BASF](#)

Green Sense Concrete is an optimized mixture program in which recycled cementitious and non-cementitious materials are used in combination with specially formulated BASF admixtures. The result is an environmentally preferred, cost-effective concrete that meets, and often exceeds, performance targets. The positive impact of using Green Sense Concrete on sustainability criteria is quantified by certified eco-efficiency analysis or life-cycle analyzer tool.

[Green Sense Concrete from BASF - North America](#)

Green Sense® Concrete Technology: Unique performance package that optimizes concrete mixtures with regard to environmental friendliness, performance and production costs.

[Green Sense® Concrete Technology - BASF](#)

Green Sense Concrete is an optimized mixture program in which recycled cementitious and non-cementitious materials are used in combination with specially formulated BASF admixtures. The result is an environmentally-friendly, cost-effective concrete that meets, and often exceeds, performance targets.

[Green Sense Concrete - Master Builders Solutions, BASF](#)

Green Sense Concrete. Green Sense Concrete is an optimized mixture program in which recycled cementitious and non-cementitious materials are used in combination with specially formulated BASF admixtures. The result is an environmentally-friendly, cost-effective concrete that meets, and often exceeds, performance targets.

[Green Sense Concrete - Master Builders Solutions, BASF](#)

Green Sense Concrete is an environmentally preferable, cost-effective concrete with optimized proportions in which supplementary cementitious materials, non-cementitious fillers, or both, are used with specially formulated BASF admixtures from Master Builders Solutions, to meet or exceed performance targets.

[Green Sense Concrete - United Kingdom and Ireland](#)

Green Sense Concrete is a way to lower the ecological impact of concrete without sacrificing performance. BASF has combined Green Sense Concrete technology with a customized, interactive Eco-Efficiency Analysis program to quantify its ecological and economic benefits and create added value for our customers.

[Concrete Technology in Focus - BASF Construction North America](#)

The construction of BASF's new office building in Ludwigshafen marked the first use of Green Sense Concrete technology in Europe. Set for completion in 2015, the 35,000-square-meter, seven-story building has already been awarded a preliminary gold certificate by DGNB (German Sustainable Building Council).

[Green Sense Concrete - Master Builders Solutions](#)
