Guide Wall Prevents small animals from accessing danger areas The system consists of standard 1m straight lengths, with additional elements to cater for changes in gradient or direction. The integral barriers on the front face prevent small animals from climbing into the danger area, while the front foot area suppresses vegetation and provides a clear movement area for animals.

Sacrificial Guide Wall Formers are used to accurately form an in-situ concrete guide wall which is critical in the positioning and alignment of piles in a contiguous or secant piled wall. From a customer's pile layout plan Cordek will produce a drawing detailing the size, shape and position of each former. After customer approval of the layout drawing each former is CNC cut from a solid block of Filcor (Expanded Polystyrene).

Re-usable Guide Wall Formwork is used to accurately form an in-situ concrete guide wall which is critical in the positioning and alignment of piles within contiguous and secant piled walls. Typically the formwork consists of a plywood backing onto which the CNC profiled Filcor (Expanded Polystyrene) cusps are laminated, this then forms the guide wall profile.

Diaphragm Wall Construction - railsystem.net

The guide walls are constructed on the ground surface to outline the desired slurry trench and guide the excavation machinery.
Excavation is done using a special clamshell-shaped digger or a hydromill trench cutter, suspended from a crane. The excavator digs down to design depth (or bedrock) for the first wall segment.

Slurry wall - Wikipedia

Garden and boundary walls should be inspected from time to time to see if any repairs are necessary, or whether a wall needs rebuilding. Such walls are amongst the most common forms of masonry to...

We recommend using wooden battens secured to the wall as a guide, as they'll also help prevent slippage while the adhesive is setting. Step 1 Align your gauge rod, vertical line and skirting/floor, then pencil mark alongside the rod's top tile mark. Do this all the way up the wall following the vertical line until the rod touches the ceiling.
