© 2014 School Edition

The GRADE process begins with asking an explicit question, including specification of all important outcomes. After the evidence is collected and summarized, GRADE provides explicit criteria for rating the quality of evidence that include study design, risk of bias, imprecision, inconsistency, indirectness, and magnitude of effect.

Reflux of the contents of the stomach into the oesophagus is a normal physiological event that occurs in many people after eating. When gastric reflux causes a person to have symptoms and/or complications, they are said to have gastro-oesophageal reflux disease (GORD); the Montreal definition. 2 This is a patient-centred definition that frames GORD as a range of disorders, including non ...
