mathematics. We need to teach students to use both these languages. We can work on problems within mathematics and we can work on problems that use mathematics as a tool, like problems in science and geography. Mathematics can describe and explain but it can also predict what might happen. That is why mathematics is important.

The program AsTeR is an excellent prototype for speaking mathematics; indeed it seems quite worthy of use for the reading of TEX mathematics to visually disabled persons. Nevertheless, there is a problem with this approach: TEX does not provide an encoding of the semantics for the mathematical material, since TEX is only a presentation view of mathematics supported by TEX.

### How can we speak math? - EECS at UC Berkeley

The Oxford Handbook of the History of Mathematics-Eleanor Robson  
2008-12-18 This Handbook explores the history of mathematics under a series of themes which raise new questions about what mathematics has been and what it has meant to practise it. It addresses questions of who creates mathematics, who uses it, and how. A broader understanding of mathematical practitioners naturally leads to a new appreciation of what counts as a historical source. Material and oral evidence is drawn upon as
