Most Harleys are air-cooled, which makes perfect sense because the wind cools your engine as you ride. But when you're stuck in traffic, the cooling stops. The slower you go, the more your engine suffers. That's why smart Harley owners install a Harley-Davidson cooling fan. It blows life-saving air across your V-twin even when it's sitting still—which is when it needs it most.

Insert cover over rear oil line hose (2). Position cover 25.4 mm (1 in) from upper spring clamp on rear oil line hose. e. Install spring clamp onto oil line hose and install oil line hose onto head. f. With spring clamp loose, rotate hose for maximum clearance between the fan housing and the oil line hose cover (3).

J07064_539914_on_US—COOLFLOW™FAN KIT|Harley-Davidson-SIP

Unlike traditional fan kits that try to cool the engine by blowing air across the cylinders and often onto your legs, the CoolFlow Fan Kit keeps the riders comfortable by pulling air away from the rear cylinder and exhaust pipe, and directing it toward the ground. Keep your cool on a sweltering summer day.

I poked around on the forum and couldn't find anything about the Harley Davidson Coolflow engine cooling fans. Sorry if this is a refresh. When I bought my bike, it had Lovejugs on it. During the summer it did keep the engine cooler, but the heat on my right leg was most uncomfortable, and after a while I took it off.
