Hawking On The Big Bang And Black Holes

Professor Stephen Hawking's final theory on the origin of the universe, which he worked on in collaboration with Professor Thomas Hertog from KU Leuven, has been published today in the Journal of High Energy Physics. The theory, which was submitted for publication before Hawking's death earlier this year, is based on string theory and predicts the universe is finite and far simpler than many current theories about the big bang say.

~~Stephen Hawking's Final Theory About The Big Bang~~

In Hawking and Hertog's newest theory, time is the fly in the ointment, keeping cosmic inflation from aligning with general relativity. So they treated the moments after the Big Bang, when...

"The Hawking Excitation" is the 21st episode of the fifth season of The Big Bang Theory that first aired on CBS on April 5, 2012. It is the 108th episode overall. After learning that Stephen Hawking is coming to lecture at Caltech, Howard (Simon Helberg) is hired to maintain his wheelchair equipment. When Sheldon (Jim Parsons) discovers this, he is desperate to meet Hawking.

~~The Hawking Excitation - Wikipedia~~

At the time of the Big Bang, all the matter in the universe was smooshed into an incredibly hot, infinitely dense speck of matter. But what happened before that? It turns out, famed physicist...

Storyline. Renowned scientist Stephen Hawking is coming to the university for an extended guest lecture series, and an excited Howard has been asked to maintain the equipment on his wheelchair for his entire stay. Since Howard knows that Sheldon is enamored with Hawking considering him the only person on the face of the planet that is his intellectual equal, Howard plans on introducing Sheldon to Hawking, that is until Sheldon, who is yet unaware of Hawking's visit or Howard's connection ...

~~Sheldon meets Stephen Hawking The big bang theory YouTube~~

In the 1960s, Hawking and the Oxford University physicist Roger Penrose proved that when space-time bends steeply enough, such as inside a black hole or perhaps during the Big Bang, it inevitably collapses, curving infinitely steeply toward a singularity, where Einstein's equations break down and a new, quantum theory of gravity is needed.
