Speed Shop - Competition Engines

Several versions of the 304ci engine were produced. Coded LV2 or A9L, they were used on the VK Group A SS. This series was painted black. During the life of the VL series, HSV released a Group A EFI version of the LV2 engine. From the VN series, Holden changed the engine designation to 5000 V8. Blocks were now drilled for the Chev bolt pattern.

a standard rebuilt should hit around 2k, for a stock standard motor, they have to use hardened valve seats for ULP so it will be fine for LPG. the 100% gas thing, is for the tune and fuel system, when you install it, you get the engine tuned and set up for gas (remove fuel tank, run a gas carby/injection).
