Keeping horses and ponies healthy and happy. Owning and caring for a horse or pony is great fun and immensely rewarding. But it's also a big responsibility and a long-term commitment, in terms of care, hard work and finances. There's no one 'perfect' way to care for all horses and ponies because every animal and every situation is different.

Step 4 provides specialist treatments within NICE guidelines. In comparison to other steps, Step 4 treats a small minority of people. This is usually because the treatments in steps 2 and 3 haven't helped them enough, or because they are at risk of self-neglect or harm, functional impairment or are dealing with more complex conditions, which possibly include other social factors or chronic ...

Stepped Care | Mental Health Matters

Hoof care is an important part of the daily grooming routine. The hooves should be " picked " daily to remove manure, dirt, and stones, and checked for signs of bruising, odor, discoloration, or discharge. The shoes should also be checked for wear and tightness of the nails (see Routine Health Care of Horses : Shoes). Hoof dressings may be needed, but care should be taken to apply them appropriately.

The first step is to have your veterinarian rule out any underlying disease or dental problem. Also watch your horse carefully when he's eating. If he chews very slowly and takes a long time to eat, he may be experiencing pain or difficulty in swallowing. If all correctable causes have been ruled out, the horse needs a diet change.
