Rigging comprises the system of ropes, cables and chains, which support a sailing ship or sail boat's masts—standing rigging, including shrouds and stays—and which adjust the position of the vessel's sails and spars to which they are attached—the running rigging, including halyards, braces, sheets and vangs.

Rigging - Wikipedia

A preventer is a line used to keep the boom from suddenly swinging across the boat in a situation such as an accidental gybe. When the boom swings quickly from one extreme to the other, the forces generated can be huge and result in damage to the boat or injury to anyone in the way of the boom or the mainsheet tackle. Someone can easily be knocked overboard.

How to Rig Your Own Boom Preventer Line

Leech, lizard, creature, and tube lures are all popular choices for Carolina rig setups. Insert the point of the hook through the small hole at the end of the lure, then arrange the lure so that it conceals as much of the hook as possible. You also have the option of fishing a Carolina rig with a plug or live bait, as well.
