The Human Fertilisation and Embryology Act 1990 sets out prohibitions relating to the creation, use and storage of human embryos and human admixed embryos, and the use and storage of human gametes. Some of these prohibitions are absolute - for example, a human embryo can never be placed in an animal or vice versa.

Human embryogenesis Embryogenesis, the first eight weeks of development after fertilization, is an incredibly complicated process. It's amazing that in eight weeks we're transforming from a single cell to an organism with a multi-level body plan. The circulatory, excretory, and neurologic systems all begin to develop during this stage.
