Terrible sounds coming out of the port side transmission. It turns out that the problem was that one of the spark plug wires had come off and the engine was only running on 7 cylinders. Once the wire was properly re-seated onto the spark plug everything was back to normal.

Hurth transmission noise | Club Sea Ray

Transmission shifts into reverse fine but will not shift into reverse when the shift lever is in the reverse position unless the propeller shaft is spinning ...

Hurth HBW250 Shifting Issue - YouTube

Completely normal and will lead to a rattling in the transmission at an idle. When all things are normal the rattle will always go away with just a little throttle being applied. Things that aggravate an otherwise "normal noise" are a poorly running engine, too low an idle (below 550 rpm in gear), Worn and loose transmission dampener plate, loose shaft coupler, and growth or fouling of the propeller.

ZF marine transmission troubleshooting.

There's always the Borg Warner velvet drives. And there were two lesser known transmission companies that had similar products, but I don't remember their names, but did find them through message boards. The hurth had a standard SAE bellhousing mount, I think it was SAE 3. Going with a non hurth may require changing out the damper plate.

Checking the Hurth HBW 50 transmission oil level; Changing the fuel filters on the Universal M25; Replacing the Oberdorfer salt water pump 202 M-15 impeller; Touching up - practically repainting - the paint on the Universal M25 engine; Draining the coolant from the Universal M25; Refilling the coolant and bleeding the cooling system.

Universal M25 Diesel with Hurth HBW-50 transmission

A key part of the automotive transmission's function is providing initial slip between your car's engine and wheels so that your engine doesn't stall as it tries to get your car moving. It does this either via a foot-operated clutch (manual transmission) or a torque converter (automatic transmission).
